Biographical Data

Michael J. Fischer

January 12, 2018

Personal

Born: Ann Arbor, Michigan, April 20, 1942.

Married: Alice E. Waltz, June 1963.

Children: Edward, b. 1969.
Robert, b. 1972.
David, b. 1978.

Education

Graduate (1960) of Ann Arbor High School, Ann Arbor, Michigan.

Higher degrees:

Bachelor of Science in Mathematics University of Michigan	December 1963
Master of Arts in Applied Mathematics Harvard University	June 1965
Doctor of Philosophy in Applied Mathematics Harvard University *Dissertation:* "Grammars with Macro-like Productions." *Advisor:* Professor Sheila A. Greibach	June 1968

Employment

Yale University	
Professor of Computer Science	1981–
Director of Graduate Studies, Computer Science	1992–1999
Director of Undergraduate Studies, Computer Science	1987–1988
University of Washington	
Professor of Computer Science	1975–1981
Director, Computer Science Laboratory	1976–1979
Massachusetts Institute of Technology	
Associate Professor of Electrical Engineering	1973–1975
Assistant Professor of Mathematics	1969–1973
Carnegie-Mellon University	
Assistant Professor of Computer Science	1968–1969
Harvard University	
Teaching Fellow	1965–1967

Summer and Visiting Positions:

University of the Saarland Guest of the Sonderforschungsbereich 124	Fall 1988
Georgia Institute of Technology Visitor in Computer Science	Spring 1980
Eidgenossische Technische Hochschule, Zurich Guest of the Research Institute in Mathematics	Summer 1975

University of Frankfurt Gastprofessor	Summer 1974
University of Toronto Visiting Associate Professor	Spring 1974
University of Warwick Senior Visiting Fellow	Summer 1972
IBM Research Laboratories, research	Summer 1967
Bell Telephone Laboratories, research	Summer 1966
Harvard University, research assistant	Summer 1965
University of Michigan, research assistant	Summer 1964
Lawrence Radiation Laboratory, laboratory technician	Summer 1963
John Hancock Mutual Life Insurance Co., summer student	Summers 1961 and 1962

Honors

Phi Beta Kappa

Phi Kappa Phi

Listed in *Who's Who in America*, *Who's Who in the World*, and *Who's Who in the East*, Marquis Who's Who, Inc., various editions, 1980—.

Selected as ACM Fellow, 1996.

Received "2001 PODC Most Influential Paper Award" with Nancy Lynch and Michael Paterson for refereed publication [30]. Certificate and prize presented August 28, 2001, at the 20th ACM Symposium on Principles of Distributed Computing, Newport, Rhode Island. Prize subsequently renamed as the "Edsger W. Dijkstra Prize in Distributed Computing".

Professional Society Memberships

Association for Computing Machinery

SIGACT (Special Interest Group on Automata and Computability Theory)

European Association for Theoretical Computer Science

American Mathematical Society

Service to Research Community

Member of Technical Committee on Mathematical Foundations of Computing, IEEE Computer Society, 1970–.

Member of program committees, ACM Symposia on Theory of Computing, 1970, 1971, 1972 and 1976.

Secretary-Treasurer, ACM SIGPLAN (Special Insterest Group on Programming Languages), 1971–73.

Guest editor for special issue, *Journal for Computer and System Sciences*, 1972.

Co-organizer (with Professor Meyer), Project MAC Workshop Conference on Concrete Computational Complexity, 1973.

Local Arrangements Chairman for the ACM SIGACT/SIGPLAN Conference on Principles of Programming Languages, 1973.

Member of editorial board, *Journal of Computer Languages*, 1975–85.

Associate Editor, *ACM Transactions on Mathematical Software*, 1976–77.

Member of editorial board, *Acta Informatica*, 1976–.

Program Chairman, 17th IEEE Symposium on Foundations of Computer Science, 1976.

Program Chairman, 11th ACM Symposium on Theory of Computing, 1979.

Area Editor for Algorithms and Complexity Theory, *Journal of the Association for Computing Machinery*, 1979–1982.

Member of editorial board, *Journal of Algorithms*, 1979–1984.

Program Chairman, ACM SIGACT-SIGOPS Symposium on Principles of Distributed Computing, August 1982.

Member of program committee, 23rd IEEE Symposium on Foundations of Computer Science, October 1982.

Member of program committee, 10th ACM SIGACT-SIGPLAN Symposium on Principles of Programming Languages, January 1983.

Member of organizing committee, Symposium on Mathematical Methods for VLSI, Oberwolfach, Germany, November-December, 1983.

Editor-in-Chief, *Journal of the Association for Computing Machinery*, 1982–1986.

Member of executive advisory board for "The Encyclopedia of Physical Science and Technology", Academic Press, 1984–.

Member of editorial board, Wiley–Teubner Series in Computer Science, 1985–.

Member of program committee, Conference on Theoretical Aspects of Reasoning about Knowledge, Asilomar, California, March 1986.

Member of organizing committee, Workshop on Theory and Practice of Fault Tolerant Computing, Asilomar, California, March 1986.

Member of program committee, 18th ACM Symposium on Theory of Computing, May 1986.

Member of advisory board for the journal, *Information and Computation* (formerly *Information and Control*), 1986–1990.

Member of ACM Editorial Committee, 1986–1989.

Member of program committee, 28th IEEE Symposium on Foundations of Computer Science, October 1987.

Member of organizing committee, Symposium on Mathematical Methods for VLSI and Distributed Computing, Oberwolfach, Germany, November, 1987.

Member of program committee, 7th ACM Symposium on Principles of Distributed Computing, August 1988.

Member of program committee, 8th ACM Symposium on Principles of Distributed Computing, August 1989.

Member of program committee, 3rd Conference on Theoretical Aspects of Reasoning about Knowledge, Asilomar, California, March 1990.

Member of program committee, 15th International Symposium on Mathematical Foundations of Computer Science, Banská Bystrica, Czechoslovakia, August 1990.

Member of organizing committee, Symposium on Mathematical Methods for VLSI and Distributed Computing, Oberwolfach, Germany, June, 1991.

Member of program committee, 13th ACM Symposium on Principles of Distributed Computing, August 1994.

Member of program committee, 21st IEEE International Conference on Distributed Computing Systems (ICDCS-21), April 16–19, 2001 in Phoenix, Arizona.

Member of program committee, 5th IEEE International Symposium on Network Computing and Applications (IEEE NCA'06), July 24–26, 2006, Cambridge, MA, USA.

Member of program committee, 10th International Conference on Principles of Distributed Systems (OPODIS'06), December 12–15, 2006, Bordeaux, France.

Program co-chair, 12th International Symposium on Stabilization, Safety, and Security of Distributed Systems (SSS 2010), September 20–22, 2010, New York City, USA.

Member of program committee, 33rd Annual ACM SIGACT-SIGOPS Symposium on Principles of Distributed Computing (PODC), July 2014, Paris, France.

Public Service

Founding member of *TrueVote Connecticut* (TrueVoteCT.org), a public-service organization concerned with voting technology and election integrity in Connecticut, established January 5, 2005.

Vice-chair of State of Connecticut Voting Technology Standards Board. Appointed to board by Governor Jodi Rell; elected vice-chair by the board members. 2005–06.

Member of Board of Advisors (pdf) for Verified Voting.org and Verified Voting Foundation, January 2013–.

Member of the Board of Directors of the Yale Figure Skating Club, Inc., ≈1985–present. Most recents term as President, 2009-2015. Vice-president, 2015–.

Consulting

Applied Data Research on the AMBIT/G project, 1970.

Research and Consulting, Inc., 1974–75.

Xerox Palo Alto Research Center, 1982.

Kencast, Inc., 1994–.

Service on National and International Committees

Committee on Recommendations for U.S. Army Basic Scientific Research, 1978–81.

Advisory Committee to the National Science Foundation, 1978–81.

Review committee for Coordinated Experimental Research program of the National Science Foundation, February 1982.

Site visit panel for Coordinated Experimental Research program of the National Science Foundation, November 1984, February 1988.

Member of the Kosaraju Study Group of the Advisory Committee for Computer Research, National Science Foundation that produced the report "Meeting the Basic-Research Needs of Computer Science", December 1986.

Member of final panel for Coordinated Experimental Research program of the National Science Foundation, February 1987.

Elected member of board of directors of The Computing Research Association, 1988–91.

Founding member of CRA subcommittee on the Status of Women in Computer Science, 1990–93.

Chair of international scientific advisory board (Fachbeirat) for the Max–Planck–Institute für Informatik in Saarbrücken, Germany, 1993–2006.

Member of subcommittee of the Scientific Academic Advisory Committee (SAAC) of the Weizmann Institute of Science, Rehovot, Israel, to review the computer science program, November 4–6, 1998.

Member of the External Advisory Board, Department of Computer Science and Engineering, University of Connecticut, 2000–2014.

Guest professor of Wuhan University and member of Academic Committee of the State Key Laboratory on Software Engineering, Wuhan, China, 2001–03.

External reviewer in the Chancellor's assessment process of the Department of Computer Science and Engineering at the University of Connecticut, April 29–May 1, 2001.

Co-organizer (with Robert Grober) of symposium, "Voting in an e-Democracy", Yale University, April 2, 2004. (See URL `http://www.eng.yale.edu/evoting/`.)

Member of evaluation team for Internaltional Max-Planck Research School for computer science in Saarbrücken, Germany, October 11–12, 2004.

Invitations to Speak and/or Participate

IBM Symposium on the Complexity of Computer Computations, New York, April 1972.

Symposium on Algorithms and Complexity Theory, Oberwolfach, Germany, November 1972.

American Mathematical Society Symposium on Complexity of Real Computational Processes, April 1973.

Symposium on Automata Theory and Formal Languages, Oberwolfach, November 1973.

Symposium on Algorithms and Complexity Theory, Oberwolfach, October 1974.

Second GI Conference on Automata Theory and Formal Languages, Kaiserslautern, May 1975.

Annual meeting of the Association for Symbolic Logic, St. Louis, January 1977.

Symposium on Algorithms and Complexity Theory, Oberwolfach, Germany, October 1977.

Workshop on Interprocess Communication in Highly Distributed Systems, Georgia Institute of Technology, November 20–22, 1978.

Distinguished Lecturer Series in Computer Science and Statistical Computing, University of Texas at Dallas (2 lectures), January 29 and 31, 1979.
Title: "On the Complexity of Synchronization Problems."

Symposium on Algorithms and Complexity Theory, Oberwolfach, Germany, October 1979.
Title: "Concurrent Graph Searching."

Symposium on Efficient Algorithms, Oberwolfach, Germany, February 1981.
Title: "Using Clocks to Improve the Efficiency of Distributed Algorithms."

Distinguished Lecturer Series, Brown University, December 9, 1981.
Title: "Distributed Appointment Calendars."

Conference on Foundations of Computation Theory, Borgholm, Sweden, August 1983.
Title: "The Consensus Problem in Unreliable Distributed Systems (A Brief Survey)."

Symposium on Mathematical Methods for VLSI, Oberwolfach, Germany, November and December, 1983.
Title: "On Distributed Consensus and its Implications for VLSI."

Invited lecture, Columbia Theory Day, New York, March 22, 1985.
Title: "Robust and Verifiable Cryptographically Secure Elections."

Invited address, Workshop on Fault Tolerant Computing, Asilomar, California, March 17–19, 1986.
Title: "A Theoretician's View of Fault Tolerance."

Centenniel Lecture, Georgia Institute of Techology, May 21, 1986.
Title: "Trends in the Theory of Distributed Computing."

Distinguished Lecture, University of Washington, October 9, 1986.
Title: "Trends in the Theory of Distributed Computing,"

Distinguished Lecture, Purdue University, April 13, 1987.
Title: "Trends in the Theory of Distributed Computing,"

Symposium on Mathematical Methods for VLSI and Distributed Computing, Oberwolfach, Germany, November, 1987.
Title: "Relative Knowledge and Belief."

Invited address, HAL Institute of Computer Technology: Osaka campus, September 13, 1988; Nagoya campus, September 14, 1988.
Title: "A Theoretical Approach to Fault-Tolerant Distributed Computing."

Invited address, Symposium on Formal Techniques in Real-Time and Fault-Tolerant Systems, University of Warwick, September 22–23, 1988.
Title: "Reasoning about Uncertainty in Fault-Tolerant Distributed Systems."

Symposium on Complexity Theory, Oberwolfach, Germany, November, 1988.
Title: "Communicating a Secret Bit without Cryptography."

DIMACS Workshop on Connections between Distributed Computing and Cryptography, Princeton, New Jersey, October 4–6, 1989.
Title: "Secret Bit Transmission using a Random Deal of Cards."

Invited address, "Theoretical Computer Science Day," Johns Hopkins University, Baltimore, Maryland, November 17, 1989.
Title: "Secret Bit Transmission using a Random Deal of Cards."

NSF Collaboration Technology and Coordination Theory Workshop, Washington, D.C., June 2–5, 1991.
Title: "Decision Making Based on Practical Knowledge" (presentation of research progress on joint NSF grant).

Symposium on Mathematical Methods for VLSI and Distributed Computing, Oberwolfach, Germany, June 23–29, 1991.
Title: "Multiparty Secret Key Exchange Using a Random Deal of Cards."

Invited speaker, *10th Annual ACM Symposium on Principles of Distributed Computing*, Montreal, Canada, August 19–21, 1991.
Title: "Theory of Distributed Computing: A Decade Later."

Keynote speaker, *60th Birthday Celebration for Professor Günter Hotz*, Saarbrücken, Germany, November 15, 1991.
Title: "Decision Making in the Presence of Noise."

Invited talk, *Weizmann Workshop on Probabilistic Proof Systems And Cryptography, Program Checking And Approximation Problems*, Rehovot, Israel, January 10–13, 1994.
Title: "On the Indistinguishability of Probabilistic Ensembles."

Invited speaker, *Symposium to honor Juris Hartmanis & Richard Stearns 1993 Turing Award Recipients*, Albany and Schenectady, New York, March 17–18, 1994.
Title: "Indistinguishability Relations as Measures of Approximation in Probabilistic Computation."

Invited speaker, *Iowa State 25th Anniversary Celebration, Ames Iowa, April 18, 1994*
Title: "The Role of Theory in the Practical World of Computing."

Invited speaker, *Festkolloquium in celebration of the 60th birthday of Herrn Professor Dr. Arnold Schönhage*, Rheinische Friedrich-Wilhelms-Universität, Bonn, December 1, 1994.
Title: "Indistinguishability Relations as Measures of Approximation in Probabilistic Computation."

Invited speaker for "Distinguished Seminar Series", Washington University, St. Louis, October 11, 1996.
Title: "Reliable Satellite Broadcast of Large Digital Objects."

Invited panelist to "Olmsted Symposium on Instilling Ethics", Yale University, February 27–28, 1998.

Keynote speaker, "Fourth Annual International Computing and Combinatorics Conference (COCOON)", Taipei, Taiwan, August 12–14, 1998.
Title: "Estimating Parameters of Monotone Boolean Functions".

Keynote speaker, "International Symposium on Distributed Computing", Bratislava, Slovac Republic, September 27, 1999.
Title: "What Have We Learned from Two Decades of Distributed Computing Research?"

Invited panelist, "Internet Policy Institute e-Voting Workshop", Arlington, Virginia, October 11–12, 2000.

Invited "Laudatio" address, honorary doctorate degree award ceremony for Professor Günter Hotz, held at the University of Paderborn, Germany, December 15, 2000.
Title: "Günter Hotz—Eminent Master of Computer Science".

Invited speaker, "International Symposium on Software Engineering (ISES'01)", Wuhan, China, March 24, 2001.
Title: "A Simple Game for the Study of Trust in Distributed Systems".

Invited panel moderator, "Regulating Search?: A Symposium on Search Engines, Law, and Public Policy," Yale Law School, December 3, 2005.

Invited participant, "Workshop on Data-Intensive Scalable Computing in Education (DISC 2008)", University of Washington, Seattle, July 16-18, 2008.

Invited speaker, "Lynch Celebration" at PODC'08, Toronto, Ontario, Canada, August 20, 2008.
Title: "Evolution of Distributed Computing Theory: From concurrency to networks and beyond".

Invited speaker, "Mike66 Workshop", University of Warwick, England, September 18, 2008.
Title: "Analysis of Think-a-Dot". (Joint work with Albert R. Meyer and Michael S. Paterson.)

Invited speaker, "Workshop on Decentralized Mechanism Design, Distributed Computing, and Cryptography", Nassau Inn, Princeton, NJ, June 3-4, 2010. Sponsored by DIMACS and the Princeton Center for Computational Intractability.
Title: "Privacy-Enhanced Vickrey Auctions". (Joint work with René Peralta.)

Invited participant, "Meeting on Privacy-Enhancing Cryptography", National Institute of Standards and Technology, Gaithersburg, Maryland, December 8–9, 2011.

Invited panelist, "Apple vs. the FBI: A discussion with Professors Kyle Jensen (SOM), John Witt (Law), Michael Fischer (Computer Science-Cryptography), and Emily Bazelon (Law / NY Times)", Yale School of Management, March7, 2016. Video link.

Invited speaker, "The Impact of Algorithms (IOT) on our Daily Lives", Branford Rotary Club Distinguished Speaker Program, March 9, 2016.

Invited speaker, Symposium on "Programming: Logics, Models, Algorithms and Concurrency", Austin, Texas, April 29–30, 2016. Symposium organized to recognize Jayadev Misra's accomplishments on the occasion of his retirement.
Title: "Why Computer Science Needs Abstract Models". Video link.

Invited speaker to Challenges of Artificial Intelligence, New Technologies and Robots Workshop, Information Society Project, Yale Law School, May 30, 2016.
Title: "Eternally Flawed AI Systems".

Invited panelist, "Hacking the Election" conference, Information Society Project, Yale Law Wchool, September 20, 2016. Video link to panel 2.

Invited speaker, Celebration in Honor of Albert Meyer, M.I.T., Cambridge, Mass., Nov. 11, 2016.
Title: "The Many Faces of Complexity: Albert Meyer's Early Explorations".

Invited speaker, Workshop in Honour of Mike Paterson's 75th Birthday, University of Warwick, England, December 14, 2017.
Title: "Consensus-like Problems in Social Choice Theory".

Research Grants and Contracts

Co-principal investigator on NSF Grant DCR74–12997-A01, "Algorithmic Complexity," to M.I.T., 1974–77.

Co-principal investigator on NSF Grant MCS77–02474, "Semantics and Complexity of Computation," 1977–80.

Principal investigator on subcontract to Georgia Institute of Technology, "Design and Analysis of Distributed Algorithms," 1980.

Principal investigator on ONR Contract N00014–80–C–0221, "Design and Analysis of Distributed Algorithms," 1979–81.

Co-principal investigator on NSF Grant MCS80–03337, "Theory of Advanced Computing Structures," 1980–81.

Co-principal investigator on NSF Grant MCS80–04111, "A Functionally Integrated Environment for Distributed Computing," 1980–81.

Principal investigator on subcontract to University of Washington, "Design and Analysis of Distributed Algorithms," 1981.

Principal investigator on NSF Grant MCS81–16678, "Theory of Advanced Computing Structures," 1981–84.

Principal investigator on ONR Contract N00014–82–K–0154, "Design and Analysis of Distributed Algorithms," 1982–88.

Co-principal investigator on NSF Grant MCS–8305382, "Theory of Cryptographic Protocols," 1983–84.

Principal investigator on NSA Grant MDA904–84-H-0004, "Theory of Cryptographic Protocols," 1984–87.

Principal investigator on NSF Grant CCR–8405478, "Theory of Algorithms and Distributed Systems", 1984–89.

Co-principal investigator on NSF Grant CCR–8709818, "Complexity Bounds in Parallel Computation", 1987–89.

Co-principal investigator on NSF Grant IRI–9015570, "Decision-Making Based on Practical Knowledge", 1990–92.

Principal investigator for project on "Modeling Belief in Security and Trust Policies", 1999–2001.

Co-principal investigator on NSF Grant CCR–0081823, "ITR: Discreet Proofs for Electronic Commerce Applications", 2000–02.

Principal investigator for Simons Postdoctoral Fellowship Award Grant for Theoretical Computer Science, 2011–13. (Fellow: Georgios Zervas; faculty mentor: Prof. Joan Feigenbaum.)

Doctoral Theses Supervised

David S. Johnson, "Near-Optimal Bin Packing Algorithms," Dept. of Electrical Engineering, M.I.T., May 1973.

Mitchell Wand, "Mathematical Foundations of Language Theory," Dept. of Mathematics, M.I.T., May 1973.

Michael M. Hammer, "Minimally Predictive Grammars and Transformations into Deterministic Top-Down Form," Dept. of Electrical Engineering, M.I.T., August 1973.

Frances F. Yao, "The Complexity of Computing the i-th Largest Element," Dept. of Mathematics, M.I.T., August 1973.

Richard J. Bonneau, "Fast Polynomial Operations Using the Fast Fourier Transform," Dept. of Mathematics, M.I.T., January 1974.

Gary L. Peterson, "The Complexity of Parallel Processes", Dept. of Computer Science, University of Washington, August 1979.

Karl Abrahamson, "Decidability and Expressiveness of Logics of Processes," Department of Computer Science, University of Washington, August 1980.

Nathaniel Mishkin, "Managing Permanent Data Objects," Department of Computer Science, Yale University, December 1984.

Josh D. Cohen Benaloh, "Verifiable Secret-Ballot Elections," Department of Computer Science, Yale University, December 1987.

Ruben Michel, "Knowledge in Distributed Byzantine Environments," Department of Computer Science, Yale University, May 1990.

Rebecca N. Wright, "Achieving Perfect Secrecy Using Correlated Random Variables," Department of Computer Science, Yale University, November 1994.

Sophia A. Paleologou, "Probabilistic Decision Making in Games and Cryptographic Protocols," Department of Computer Science, Yale University, May 1995.

Zoë Diamadi, "Societies of Randomly Interacting Finite-State Automata," Department of Computer Science, Yale University, December 2004. [Co-advised with James Aspnes.]

Hong Jiang, "Stabilizing Computation in Distributed Systems," Department of Computer Science, Yale University, December 2007.

Xueyuan Su, "Efficient Fault-Tolerant Infrastructure for Cloud Computing," Department of Computer Science, Yale University, December 2013.

Syta, Ewa, "Identity Management through Privacy-Preserving Authentication," Department of Computer Science, Yale University, December 2015. [Co-advised with Bryan Ford.]

Publications and Patents

Patents

1. M. Fischer and S. Paleologou. *Method and System for Error-Free Data Transfer*. U.S. patent number 6,012,159, issued January 4, 2000. Assigned to KenCast, Inc., Stamford, CT.
2. W. E. Steele, M. Fischer, and S. Paleologou. *Method and System for Reliable Broadcasting of Data Files and Streams*. U.S. patent number 6,272,658, issued August 7, 2001. Assigned to KenCast, Inc., Stamford, CT.
3. W. E. Steele, M. Fischer, and S. Paleologou. *Method and System for Reliable Broadcasting of Data Files and Streams*. U.S. patent number 6,567,948, issued May 20, 2003. Assigned to KenCast, Inc., Stamford, CT.
4. M. J. Fischer, H. L. Wolfgang, and W. Fang. *System, Method and Apparatus for FEC Encoding and Decoding*. U.S. patent number 7,533,324, issued May 12, 2009. Assigned to KenCast, Inc., Stamford, CT.
5. W. Fang, M. J. Fischer, and H. L. Wolfgang. *System, Method and Apparatus for Reducing Blockage Losses on Information Distribution Networks*. U.S. patent number 7,739,580, issued June 15, 2010. Assigned to KenCast, Inc., Stamford, CT.
